

SSO MISSION

To provide technical support to Department of Defense (DOD) data processing customers for development of standardized operating systems for all DOD executive software. As a Headquarters element, the SSO has been established to provide deployment of executive software for the Area Commands. . In this role, based on the best practices of the commercial data processing industry, the SSO will provide the following services to the Area Commands:

- Standard Operating Environment (SOE) planning, building, integration, documentation, distribution, implementation, and maintenance.
- Executive Software standards consolidation, implementation and compliance.
- Executive Software technical consultative services.
- Executive Software Configuration Control Board administration and oversight.
- Global problem resolution requiring developer or vendor.

- Evaluation and recommendation of preferred products to be added to the SOE.
- Oversight and administration control of technical working groups selecting additions to the SOE.
- Consultation resources for new technology insertion.
- Tuning assistance for executive software running at the Area Commands.
- Contracting Officer Technical Representative (COTR) support for executive software procurements.
- Executive Software support for historically, centrally managed applications like Stock Points ADP Replacement, Stock Control & Distribution, Requirements Data Bank, Army Standard Information Management Systems, Inventory Control Point, Defense Civilian Payroll Systems, Core Automated Maintenance Systems and Standard Base Supply System.

DISA MISSION

"To plan, engineer, develop, test, manage programs, acquire, implement, operate, and maintain information systems for C4I and mission support under all conditions of peace and war."

DISA MANDATE

The Defense Information Systems Agency is transforming the way Department of Defense users move, share, and use information. All DOD personnel need information whether they maintain or fly aircraft, operate a periscope, move a platoon, perform surgery, process transactions, or any of hundreds of other jobs supporting our country's defense. As the manager of the Defense Information Infrastructure (DII), DISA is integrating hardware and software and constructing a common operating environment to sustain warfighters need for information anytime, anywhere. The pillars of the DII are the Defense Information System Network, the Defense Message System, the Global Command and Control System, and the Global Combat Support System.

DISA is also helping protect against, detect and react to threats to both its information infrastructure and information sources. Additionally, DISA is aggressively working with DOD Agencies, the military departments, and other federal agencies, and industry.
